

终于用EEUpdate 5.17.19.02硬改成功,在国外网站找的EEUpdate应是比较新的版本,我的主板是华硕P8Z68-V-PRO,主板上网卡是Intel(R) 82579V Gigabit Network Connection。在纯Dos改,用U盘做个Dos启动盘(通用u盘装系统专用工具)。格式:eeupdate /nic=1 /mac=\*\*\*\*\*(\*你想要的12位mac地址)

EUPDATE 5.17.19.02 (2010)

To change the MAC address, boot into DOS and run eeupdate.exe to list the existing NICs.

Enter the following:

```
eeupdate /nic=[A] /mac=[B]
```

[A]= integer value representing desired NIC from list

[B]= desired MAC address with no dashes

eg: eeupdate /nic=1 /mac=13DAE813801E

CELO diagnostics utility and LANCONF are also included.

Help is available from the command line. (eeupdate /?)
